

Protect Yourself with Shingrix Vaccine: Defend Against Shingles

Discover the Power of Prevention

Shingles, also known as herpes zoster, is no laughing matter. It's a painful rash, triggered by the reactivation of the varicella zoster virus, the same culprit that causes chickenpox. This condition can lead to chronic pain and other complications, especially among seniors and those with compromised immune systems.

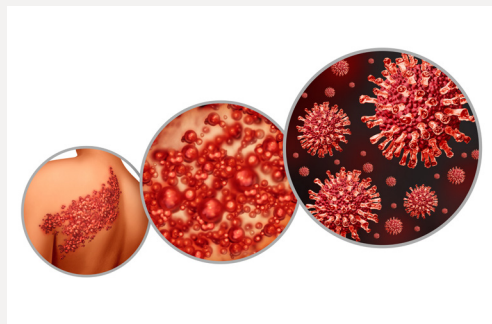

But fear not! A defense against shingles exists: the Shingrix vaccine - developed by GSK. Shingrix is an advanced recombinant subunit vaccine crafted to provide strong protection against shingles for individuals aged 50 and above, as well as for immunocompromised patients aged 18 and older.

The Benefits

- Reduce your risk of developing shingles.
- Safeguard yourself from postherpetic neuralgia and other complications.
- Enjoy peace of mind knowing that you're taking proactive steps to preserve your health.

Easy, Effective, and Essential!

Receive just two doses of Shingrix, with a 2 to 6-month interval between each, and secure lifelong protection against shingles. Don't delay; seize control of your health now!

Coverage You Can Count On

We have an important update for our valued members! From the 1st of July 2024, the UAE's leading health insurer, Daman, will expand its coverage to include the Shingrix vaccine within its DHA Compliant Enhanced schemes. Whether you're a new or existing policyholder, safeguarding against shingles is now within easy reach!

Don't allow shingles to overshadow your well-being. Embrace prevention with Shingrix, and step into a future free from the pain and discomfort of this potentially incapacitating condition.
